

TruLASERView™

Composite CAA V5

“Translates and Optimizes CAA V5 Composites Design Data for Laser Assisted Ply Lay-up”

- ◆ Enable use of CATIA 3D model information for use with laser projection systems
- ◆ Eliminates Hard Tooling and Re-tooling Costs associated with many shop floor processes
- ◆ Provides capability to quickly process and use model revisions as a result of the associability
- ◆ Reduces Manual Measuring & pre-Marking
- ◆ Streamlines the Layout Process
- ◆ Improves Production Throughout
- ◆ Assures and Organized and Repeatable process
- ◆ Supports Geometry, Text and User Specified Features
- ◆ Provides Simulation of the laser projection process
- ◆ Seamless Process Management & Documentation specific to each laser application
- ◆ Optimizes the Ply Kitting process
