

# Be assisted by an expert in your *Visual Ergonomics simulations*

Together,

we will improve visualization, safety and environmental simulations of your products

Audit

Expertise

Best practices

## How ?

Experts will work directly with you using our unique know based on proven SPEOS TECHNOLOGY Software.

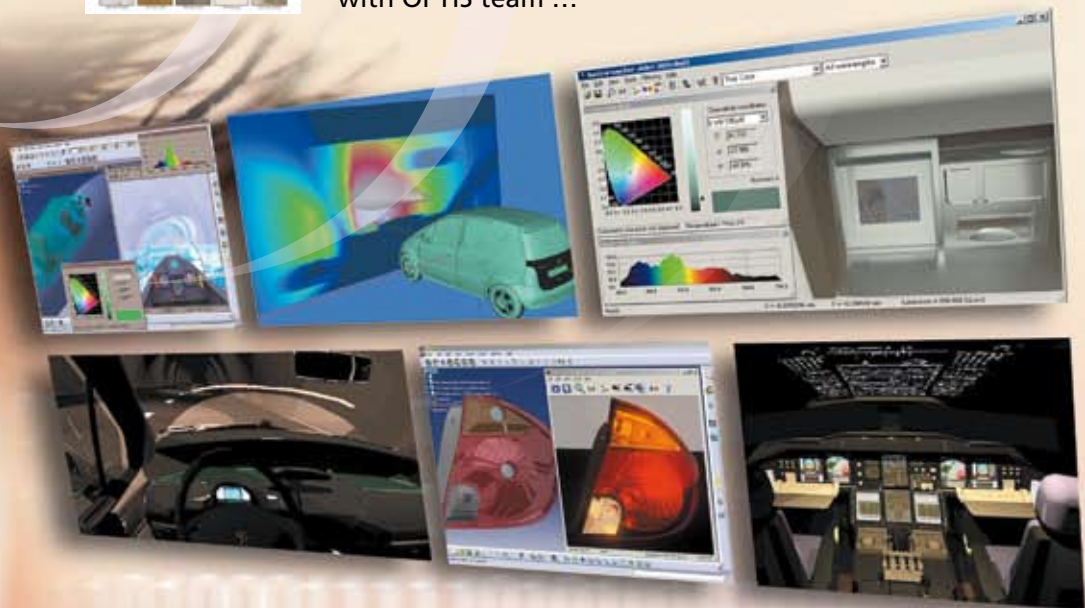

## What ?

You will see "how your product will look" and "how you will see it"

## Why ?

Take into account optical properties of material for Product Aspect Visualization, Eyes Characteristics and improve your simulation power by working with OPTIS team ...

INNOVATIONS AHEAD OF  
**LIGHT**

Our team will

## help and assist you to :

- Optimize and implement virtual Mock-Up in your process
- Generate what-if scenarios (night and day, contrasts and glare effects...)
- Choose the best material
- Customize your own measurement
- Visualize the aspect of your products in an environment
- Simulate Fog and Smoke conditions
- Conceive immersive room and reality centers
- See lit and unlit appearance
- Integrate displays in your design

SQUALE : portable surface measurement device

**LUMAX**  
AUTOMOTIVE PARTS

We are very satisfied using OPTIS SPEOS standalone software to design our products. Its optical simulation is fast and precise.
